

Professional software engineer with 5 years experience working on web applications, developer tooling, and programming languages with a focus on building efficient software that is both scalable and maintainable. Eager to contribute proven programming and software design skills to dev teams working on challenging problems.

Education

M.S. in Computer Science - Northwestern University (Expected March 2022)

B.S. in Computer Science - Northern Kentucky University (May 2019)

Work Experience

Ahalogy (A Quotient Brand)

Associate Software Engineer | May 2019 to Sept. 2020

Engineering Intern | May 2018 to May 2019

- Improved security and maintainability of Ahalogy's Muse application by leading EmberJS major version upgrade for the entire front-end codebase.
- Solved critical caching issues and improved performance of numerous pages.
- Improved workflow and automation by integrating Slack with client-facing features using AWS Lambda.
- Utilized knowledge of EmberJS, HTML, CSS, Java, Kotlin, and MySQL to make full-stack contributions to the Muse product.

IWT Health

Junior Developer | May 2016 to May 2018

- Worked closely with product stakeholders to improve user experience of IWT's Healthtrax product.
- Quickly learned and implemented features using AngularJS, C#, and Elm.

Highlighted Projects

Exhaustive list available on my website (<https://aowens-21.github.io>)

DrRacket Custom Keybindings

Implemented infrastructure for the Racket language's IDE that allows Racket programmers to customize IDE keybindings using a domain-specific language I designed.

Implemented with: **Racket**

Cactus Picker

A game I designed and created from scratch, implementing programming, art, and sound during my final month of my B.S.

Implemented with: **C++**, **SFML2**, **CMake**

Technical Skills

Proficient: JS (EmberJS, React, AngularJS), HTML, CSS, Java, C++, Racket

Experienced: C#, Python, SQL, Kotlin, Elm, Clojure, F#, Rust
