Education

M.S. in Computer Science - Northwestern University (March 2022)

B.S. in Computer Science - Northern Kentucky University (May 2019)

Work Experience

Northwestern University

Graduate Researcher/Teaching Assistant | September 2020 - Present

- Designed and implemented domain-specific languages to improve configuration capabilities of the DrRacket programming IDE.
- Used test-driven development methodology to create libraries and infrastructure for the Racket programming language and various IDE tools.

Ahalogy (now Quotient Social)

Associate Software Engineer | May 2019 to September 2020

Engineering Intern | May 2018 to May 2019

- Improved security and robustness of Ahalogy's Muse application by the upgrade of EmberJS for the front-end codebase.
- Solved critical caching issues on the home and trends pages improving correctness and decreasing load times by 50-100%.
- Engineered Slack API integration to facilitate and drive usage of client facing self-service features using JavaScript and AWS Lambda.
- Contributed several full-stack features and critical bugfixes to the Muse product using knowledge of EmberJS, HTML, CSS, Java, Kotlin, and MySQL.

IWT Health

Junior Developer | May 2016 to May 2018

- Architected configurable timezone system for a digital whiteboard application using AngularJS.
- Quickly adapted to several new projects and technology stacks and developed experience with JavaScript, Elm, C#, and SQL.

Highlighted Projects

(full list available on my website)

DrRacket Custom Keybindings

- Implemented infrastructure for the Racket programming language's IDE that allows programmers to customize IDE keybindings using a domain-specific language I designed. Implemented using **Racket**.

Cactus Picker

- Designed and owned game implementation encompassing programming, art, and sound. Implemented using C++ and SFML2.

Languages and Technical Skills

Proficient: JavaScript(EmberJS, React, AngularJS), HTML, CSS, Java, C++, Racket, Git/GitHub

Exposure: C#, Python, SQL, Kotlin, Elm, Clojure, F#, Rust, Bash, Emacs, Vim, AWS, TDD
